

SPECIFICATION AMENDMENT

Please amend specification paragraph 24 as follows.

[0024] With their exposed flexible edges 10, 11, which form so-called flexible lips 12, with a projecting strip 16 and projecting noses 17, the covers 4, 5 are pressed into the groove-shaped receiving devices 8, 9 and are held therein in a clamping manner. The projecting strip 16 as well as the projecting noses 17 have a flexible construction and place themselves elastically against the walls of the receiving devices 8, 9. A further fastening of the covers 4, 5 takes place by way of fastening screws on the ~~dashboard 6, which~~ dashboard 7, which is not illustrated in detail.
